June 2014.

WIND ENERGY: closes the first half year 2014 as the first technology to get 23% of demand.

Wind energy has closed the first half of the year as the first technology of the electric system to cover 23.2% of electricity demand, indicating the Wind Energy Association (AEE) from data of Red Eléctrica of Spain (REE).

Specifically, wind generated 28,818 gigawatt hours (GWh) in the first six months of the year. This volume also occurs after converting this technology is the first in the year 2013, a milestone in Spain and worldwide.

In addition, renewable exceeded in the first half of the year for the first time 50% of demand coverage, which helped to depress the wholesale market price of electricity or 'pool'.

This circumstance indicates the ESA, has benefited not only the domestic, but also to industrial. The country has also saved 1,440 million in fossil fuel imports in the first half and prevented 10.6 million tons of CO2 emissions by 60 million euros.

WIND BUSINESS ASSOCIATION (AEE), INCLUDED **CONAPRO** IN THE LIST OF COMPANIES APPROVED UNDER STANDARD GWO.

AEE enabled this updated with data from associated companies in training approved under the GWO PRL standard space.

Global Wind Organisation (GWO) is a coalition of some of the most important companies in the wind energy sector in the world, including Acciona, Vestas, EON, Siemens and Gamesa, which has developed a standard for basic safety training that covers the following modules : First Aid, Cargo Handling, Fire Fighting, Alturas Jobs and Survival at sea.

This training standard has been recognized by the European Wind Energy Association (EWEA) as the minimum acceptable level to be achieved by the wind sector workers to work safely.

Since January 2013 they are applying the training standards GWO (Basic Safety Training) being This training imparted only by certified entities, which is part Conapro.
