NEW ENERGY LAW 2014:

In a comprehensive document detailing government hundreds of parameters and standards in the new remuneration framework for the special scheme, which will apply from July 2013 and expects to save 1,750 million this year is based.

So far, only knew that these facilities would no longer charge premiums, some public incentives for the energy they produce, for a fee that guarantees a "reasonable" profit at around 7.5% (ten-year bond plus 300 points core) over its lifetime.

These premiums were based on reverse some of which involved significant savings for the government to generate clean energy in order to meet the requirements of the Kyoto Protocol (in 2014 Spain will pay € 700 MM for the generation of CO2, 29% less thanks renewable), employment generation, industrial fabric, I + D + I and patents. For every 1 € that the government invests in Wind gets 4 €.

On the other hand, thirty wind farms in Navarra will stop central government collect premiums, as disclosed the draft ministerial order, prepared by Industry, that has been given to the National Securities Market Commission (CNMV).

The document, which had EuropaPress access, indicates that the aid should be withdrawn to those prior to 2004 wind power plants. In Navarra, by then they were already installed windmills to generate 829.4 megawatts (MW). The measure will affect several companies that own these facilities, but mainly Acciona, whose origin is in the Navarre - EHN public company, which has 64% of the 41 parks in the Community.

CONAPRO PROMOTIONS 2014.

In 2013 we began a CONAPRO COMMERCIAL CAMPAIGNS series, will be presenting to you in 2014 on time.

We begin our series this flyer of BREATHABLE THERMAL CLOTHING, quality and comfort at unbeatable prices.

Thermal clothing Tissue Dryarn®, is a hollow microfiber polypropylene offering innovative high performance fabrics for lingerie, sportswear, socks and special technical applications, even under extreme conditions. Due to its characteristics of lightness, breathability and durability is the fiber that best expresses the potential.

Available from our facilities in Mutilva.

THE WORLD IS MOVING...

AND WE DO WITH IT!

NEM (Nuevas Empresas de Melida SL) develops lifting, assembly and performance optimization equipment and applications to be used on the **Brazil**,s wind farms construction.

We ended the month with the International SERENA SL activity. This time we travel to **Eastern Europe** to develop a new revision of life lines and Descenders Emergency.
